The Connecticut Society of Perfusion would like to sincerely thank our sponsors for their continued generosity and support.

Objective

The objectives of this one day symposium are to review and discuss the latest developments in LVAD support, gas exchange and blood gas management during neonatal ECMO, cerebral oximetry, and fluid management, as well as to present some current practices and research. The goals are to improve the knowledge of healthcare professionals and to expand their scope of practice through the active exchange of ideas and practices among professionals.
